

SUSTAINABILITY REPORT 2020

Our company is dedicated to sustainable tourism. With the aim of sustainable and GREEN experience, we will take care of tailor-made transport suggestions and options on every step of your way considering your needs and plans. Our transportation services offer you a sustainable solution for an unforgettable trip, business logistic or city trip with your friends. Welcome to iMatring, transport service company, where innovative and green logistics solutions are found.

What have we achieved in 2020?

Imatring takes care of clean traces

Sustainability has become an important part of iMatring d.o.o. company in 2020. This is why we have applied a sticker "Imatring cares of clean traces" ("iMatring skrbi za čiste sledi" – translation of Slovenian motto). We have developed stickers to encourage and remember our employees of sustainability policy and its main parts. You can find them in our office.

Education

We are planning to carry out a staff environmental training and information day. We have planned it on 24th of November. Until then we spend every week at least 15–20 minutes discussing sustainability themes.

Energy consumption

We decided to make some sustainable differences in our work this is why we have started with reducing energy consumption by shutting off the computers, turning off the lights and set all equipment on energy-saving mode.

Paper consumption

We started also with the reduction of paper consumption. We implemented only certified paper for printing (called Lettura) and we use discharged paper for meeting notes if necessary. We have set printing machine on double-sided printing which helps us to consume 50 % less paper as usual.

High-quality equipment

All equipment that we have bought in 2020 was high quality. When buying it, we considered also the sustainability criteria: eco certificates and energy saving standards.

Marketing material

We were positively motivated to consider costs and benefits of printing marketing materials only on sustainable way. We have decided that our future marketing material will be printed on hand made eco paper.

iMatring d.o.o.
